

GRIVEN
KOLORCLIP CDM150
DMX Outdoor Colour Wash

* * * * **Weatherproof** * * * *

Architectural Colour Changer

- A powerful, concentrated beam
- All functions can be accessed through 1 standard DMX 512 channel.
- Master/slave option for multiple units synchronisation
- Rotating colour wheel with 8 colours + white and black light filter
- Black out
- Very compact weatherproofed housing
- Uses 150 W CDM-lamp

Part of Griven's pioneering range of architectural lighting products, KOLORCLIP provides colour change in an ultra compact pressure diecast aluminium weatherproofed housing (IP55 certified) finished with scratch resistant polyurethane black finish. The newly designed IP20 version with spacious free air circulation slits designed on the front panel of the unit, embodies a bonus feature for indoor applications. Utilizing the CDM-SA/T 150W metal halide 9000 hour lamp, KOLORCLIP projects a bright wide 42° angle wash effect with 8 selectable colours and white, plus black-out, with in-built auto change and speed adjustment or controllable via 1 channel of DMX, and is ideal for a whole host of applications, indoor and outdoor. Multiple units can be synchronized for an even more spectacular effect. An expansion lens and a fresnel lens are options for different beam angles.

KOLORCLIP
TECHNICAL SPECIFICATIONS

-LAMP SOURCE NOT INCLUDED

Type:CDM-SA/T
Wattage (W):150
Base:G12
Lamp life (h):9.000
Lumens:10.000

COLOURS

Dichroic filters: 8 + white

- PROJECTION

Angle:42°
