KOLORJET

4000W DMX Outdoor Colour Wash

For skyscrapers

*** * * * Weatherproof * * * ***

Architectural Colour Changer

- For skyscraper illumination, concerts, movie sets etc.
 - Variable radiation angle (1° - 16°)
- Colour-changer with cyan, magenta, yellow for infinite color-variations
 - With strobe-, dimmer- and blackout-function
- Control unit for adjusting the DMX-starting address, switching the lamp, reading out the operating hours of the lamp
 - DMX-512 controlled
- Stand-alone operation possible via pre-programmed sequences
 - Master/Slave-operation possible
 - For flicker free Xenon 4000 W lamp

KOLORJET is an immensely powerful outdoor colour changer with weatherproofing to a certified IP44 rating. This far advanced unit uses a Xenon 4000W lamp for an extraordinary light output which should fulfil the most demanding applications in the architectural lighting field.

The power of the lamp is enhanced by the performance of the nickel rhodium plated reflector and the CYM colour mixing system creates an almost unlimited variety of hues. These features make KOLORJET ideal for such applications as concert touring, skyscraper highlighting and movie sets, where the quality and power of a flicker free XENON lamp are required.

An electronic zoom varies the beam size, yet another feature for a unit already packed with technology and with a wide range of capabilities, and designed for absolute reliability.

On board or remote DMX512 control gives instant access to all functions, including colour mixing, frost soft edge effect, black out, strobe and stand by (reducing power and lamp consumption). Pre-programmed automatic colour sequences are also selectable and the master/slave option allows multiple units to be operated in synchrony.

KOLORJET TECHNICAL SPECIFICATIONS

- LAMP SOURCE **NOT INCLUDED**

Type: XENON
Wattage (W): 4000
Base: SFAX 30-9,5 SFA 30-8
Lamp life (h): 1.000
Lumens: 155.000

- COLOURS

Color (MIX): CYM

- PROJECTION

Angle: 1°-16°
Zoom: Motorised
Dimmer: Mechanical
Strobe: 2 Fps
Filters: Frost

- OPERATION

DMX channels: 7
Stand alone:
Master / Slave:
On Board Control:

- HOUSING

Weather protection: IP44
Cooling: FV

- SIZE (mm)

Height: 1375
Width: 715
Depth: 680

- WEIGHT (kg)

Main fixture: 60 (143 ballast incl.)
Ballast set: 83

- POWER

Input (V): 220-380 Three-phase +N +G
HZ: 50-60
AMP: 9 (380V) - 17 (220V)
